## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-14, 18-32, 36-48, and 64-70 are rejected under 35 U.S.C. 102(e) as being anticipated by Lasheras (US 6,726,708). Lasheras discloses a method of manipulating the temperature of a patient comprising steps of positioning a balloon catheter in the stomach of the patient, exchanging heat between the balloon catheter and the stomach so as to controllably alter the temperature of a substantial portion of the patient's body, introducing a heat exchange fluid into the balloon catheter, wherein heat is exchanged between the balloon catheter and the stomach so as to controllably alter the temperature of at least a portion of the patient (entire reference).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3763

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-17, 33-35, 49-51, and 71-72 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lasheras in view of Dae (US 6,231,594). Lasheras discloses all of the claimed limitations except administering an anti-shivering mechanism to the patient. Dae does disclose administering an anti-shivering mechanism to the patient. It would have been obvious to one of ordinary skill in the art to combine the teachings of Lasheras and Dae and administer an anti-shivering mechanism to the patient in order to prevent him/her from shivering.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-51 and 64-74 have been considered but are moot in view of the new ground(s) of rejection.
